

High Pressure Valve

Bulletin 855-a

PRINCIPLES OF DESIGN

These are 4 of about 160 stainless steel close control dampers with inlet and discharge fittings. The assemblies were designed to control the air up to 3 psig (83 inches w.g.) with temperature ranging from -40°F (-40°C) to 120°F (48.88°C).

ADVANTAGES

- Time proven components
- Very accurate flow control
- Wide operating range
